MEMORANDUM FOR THE RECORD

SUBJECT: NIS Coverage of Entities within main NIS Areas

During his visit today the DDI said he felt the NIS should expedite the publication of a separate study on Nepal. He recognized that basic information on this entity exists in published NIS, but that it should be pulled together and "maintained" and published as a handy unit. I explained that this problem, specifically with respect to Nepal and a half dozen or so other such areas had been the subject of special OBI attention within the past few months, but that action had been delayed because of State's production situation, revamping of their priorities and production, etc. The DDI's final thought was that appropriate action should be taken on Nepal.
